45xx lubrication

Lubrication for your Dapol 45xx 2-6-2 tank locomotive.

The oiling points shown on the photograph below are as a supplemental to, and not replacement for the oiling instructions that came with the engine.

These oiling instructions should aid your engine's performance, but they are no complete substitute for clean, well laid track and a good controller.

If you require an out of warranty service for your locomotive, please send it to our official service agent, BR Lines

BR Lines

97 Park Lane

Guisborough
