## Ivatt tank locomotive

### Oiling your Dapol Ivatt 2-6-2 locomotive

Application of compatible oil on the point noted by the blue and red arrows will help aid running and increase longevity of parts.

Application can be made with a small screwdriver or a cocktail stick.

Please note that oiling your locomotive is always recommended, however so is regular rail cleaning and good track laying.

### Servicing

If you require an 'out of warranty' service or repair, please contact our official service agent BR Lines
